SAMPLE PREPARATION SOLUTION

FastPrep®
Sample Preparation

FastPrep® Instruments

FastPrep-24™ Classic

Catalogue Number: 116004500

Time-tested sample prep system

Effective

Unique optimized figure-8 motion ensuring a thorough grinding of the most resistant samples.

Proven

Backed by 8,500 publications.

Flexible

Easily interchangeable adapters to process any sample size (2 mL, 4.5 mL, 5 mL,15 mL or 50 mL tubes) at cryogenic or room temperature.

FastPrep-24™ 5G

Catalogue Number: 116005500

The most advanced sample prep system available

Powerful

Highest speed available (10 m/s) offering the best performance for the lysis of the most resistant samples.

Intuitive

Interactive user-friendly interface and touchscreen with more than 70 pre-programmed protocols.

Flexible

Easily interchangeable adapters to process any sample size (2 mL, 4.5 mL, 5mL, 15 mL or 50 mL tubes) at cryogenic or room temperature.

Typical settings for grinding various environmental samples with the FastPrep-24™ 5G instrument

Below is a table illustrating the typical speed and time settings for grinding 50 mg of various environmental samples with the **FastPrep-24™ 5G** instrument and Lysing Matrix E tubes.

Sample Type	FastPrep® Speed (m/s)	FastPrep® Time
Soil / Rock	5.5	2 x 30 sec
Sandy Sample	4.0	4 x 30 sec
Litter	5.5	30 sec
Brunisol Dark Gray Luvisol	5.5	40 sec
Soil from Grassland	5.5	2 x 30 sec
Rhizosphere	6.0	40 sec
Marine Sediment	5.5	2 x 40 sec
Asphalt-Permeated Soil	6.0	40 sec

FastPrep-96™ Pro

Catalogue Number: 116014500

Real Time Monitoring: LED indicators display run status

Easy Operation

Touchscreen inteface simplifies setup.

Efficient Motion

True linear motion ensures consistent results.

Flexible

Available adapters for any sample size, from 2 to 250 mL and 96-well plates.

FastPrep-96™

Catalogue Number: 116010500

High throughput sample grinding

High throughput

Process up to 192 samples simultaneously in 2 x 96 deep well plates.

Exceptional versatility

Easily interchangeable adapters available for 2 x 96 deep well plates, 96 x 2 mL tubes, 48 x 4.5 mL tubes, 20 x 15 mL tubes, 8 x 50 mL tubes and 2 x 250 mL bottles.

True linear motion

Eliminates the need to reorient plates mid-cycle.

Super FastPrep-2™

Catalogue Number: 116012500

Portable field testing

Thorough grinding

Omnidirectional motion and unique, patent-pending balanced crankshaft-slider mechanism for aggressive bead beating lysis and amazing performance.

Time saving

Complete sample lysis of even the most difficult samples in 5 to 15 seconds, and processing designed for two 2 mL Lysing Matrix tubes.

Portable

Handheld system for lab and field use, with cordless battery power supply.

FastPrep® Lysing Matrix

Tailored to environmental samples

The use of MP Bio's Lysing Matrix E and Y in combination with FastPrep® instruments ensures complete and quantitative lysis, resulting in higher yields of DNA. Lysing Matrix E and Y tubes are designed to lyse all microorganisms present in environmental samples, including difficult sources such as eubacterial spores and endospores, gram positive bacteria and yeast, and plant and animal tissues.

Our complete portfolio of Lysing Matrix tubes can be found on our website at **www.mpbio.com**.

Preservation
Solutions

Soil Preservation Solution (Lytic)

Long Preservation Period

Stabilizes soil nucleic acids for up to 1 month

Provides immediate nucleases inactivation which helps prevent rapid nucleic acid degradation.

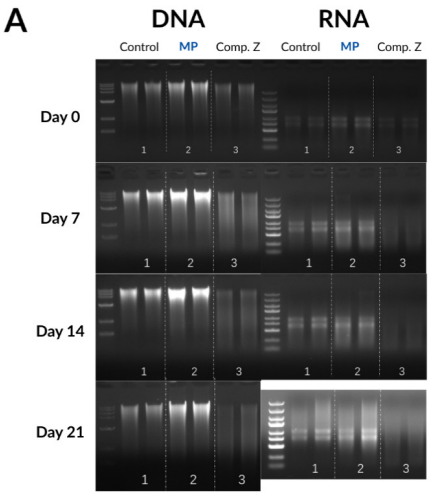
Easy-to-use protocol

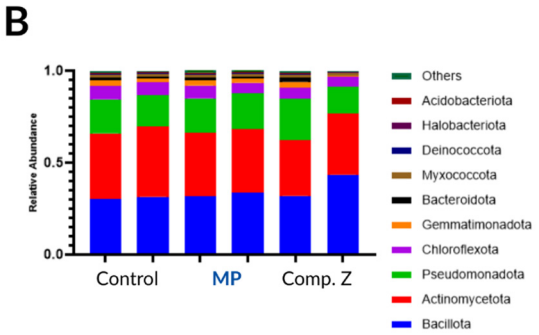
Add and preserve with ready-to-use buffer

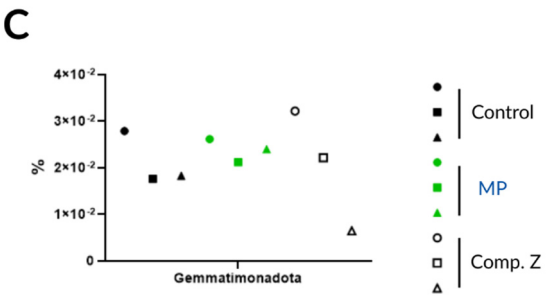
Compatibility

Works well with any commercial extraction kits for downstream applications

Performance







Soil Preservation Solution (Lytic) protects nucleic acids and preserves microbiome profiles during ambient storage.

Compost soil samples stored at room temperature for up to 21 days showed better RNA integrity and more stable microbiome composition with MP Soil Preservation Solution (Lytic) than with Competitor Z.

Order Information

Product Name	Size	Catalogue No.
Soil Preservation Solution (Lytic)	100 ml	116567100
	500 ml	116567500

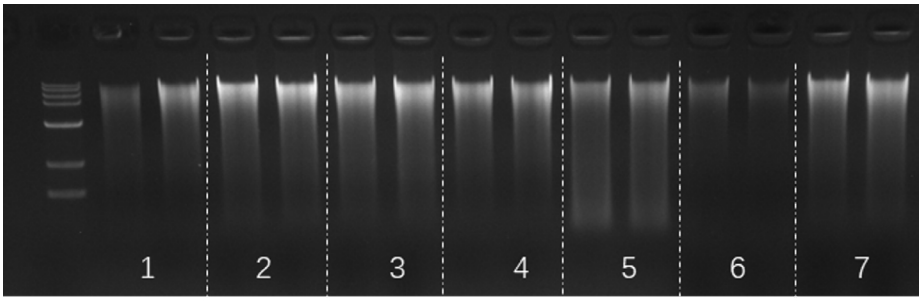
Soil Preservation Solution (Non-Lytic)

Long Preservation Period
Stabilizes soil nucleic acids for up to 1 month

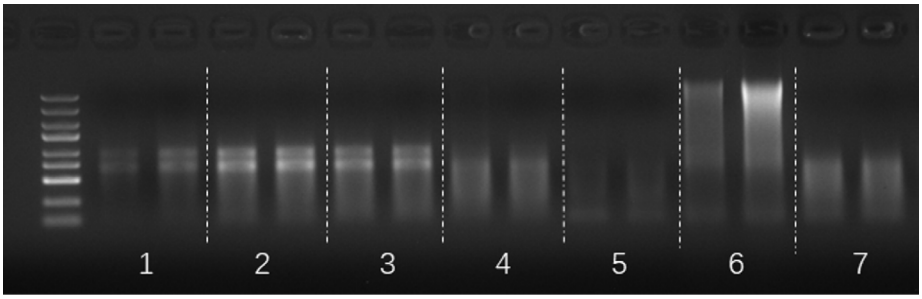
Preserves Intact Cells
Stabilize DNA and RNA without disrupting cellular integrity

Safety
No hazardous ingredient at the applicable concentrations

DNA



RNA



Lane 1: *Control (no buffer)*
Lane 2: *Soil Preservation Solution (Non-Lytic)*
Lane 3-7: *Competitors (M, N, Z, T, Q)*

Compost soil (200 mg) was treated with preservation buffers and stored at 25°C for 28 days. DNA and RNA were extracted using the SPINeasy DNA/RNA Kit for Soil (Cat. No. 116554050). Compared with the no-buffer control and competitor products, Soil Preservation Solution (Non-Lytic) supported strong nucleic acid stability during ambient storage.

Fecal Preservation Solution

Long sample stability
Supports sample stability for at least 60 days

DNA Preservation
Enabling room-temperature storage and shipping

Pathogen inactivation
Suppresses Gram-negative and Gram-positive bacteria, fungi, and inactivates viral particles

Designed for the preservation of genomic DNA in fecal samples, this solution suppresses the growth of Gram-positive and Gram-negative bacteria and fungi, while inactivating viral particles to ensure samples are safe for handling and transport. No immediate processing or freezing is required. Preserved samples remain stable for a minimum of 60 days at ambient temperature, and indefinitely when frozen.

MagBeads
Extraction Kit

MagBeads FastDNA™ Kit for Soil

High quality DNA

High concentrations of pure DNA that is free from inhibitors

Simple protocol

Easy to use, high throughput, and designed for both manual and automated magnetic processors including MPure-32™, MPure-96™ and MagFlex-96

Wide applicability

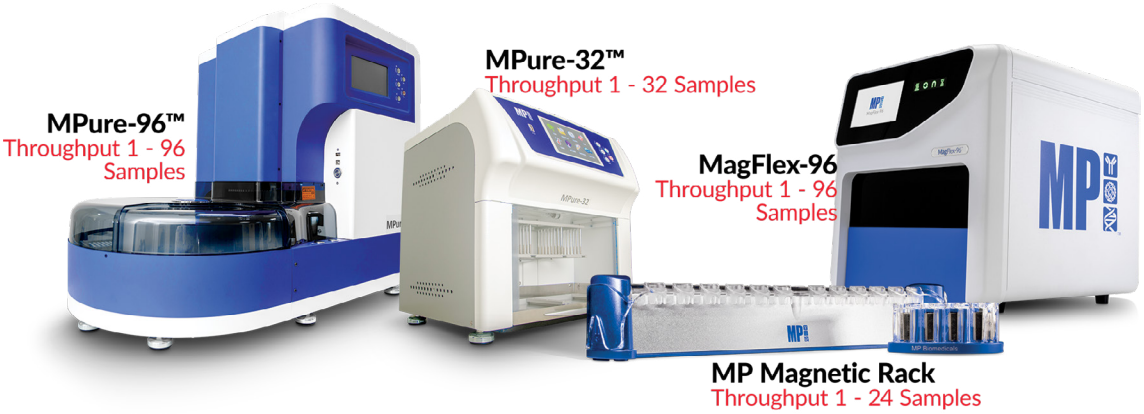
Wide range of applications, suitable for all types of soil samples

Environmentally friendly

No phenol/ chloroform or other toxic chemicals

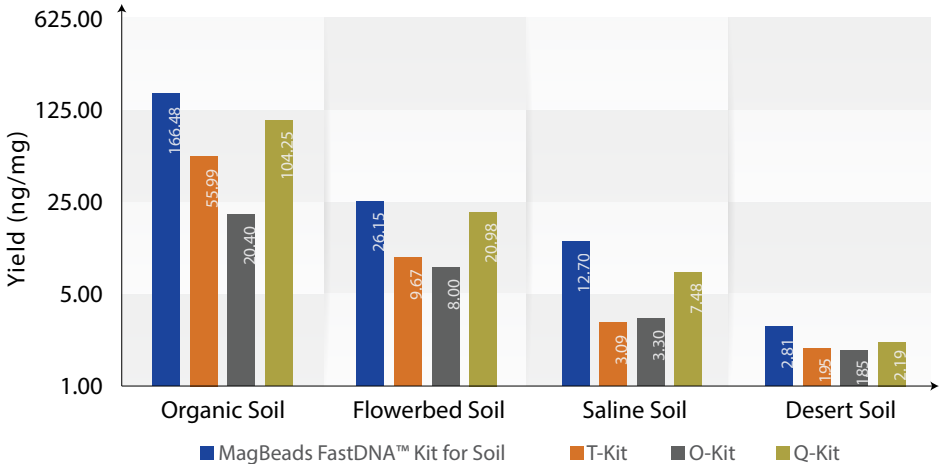
Automation Instruments

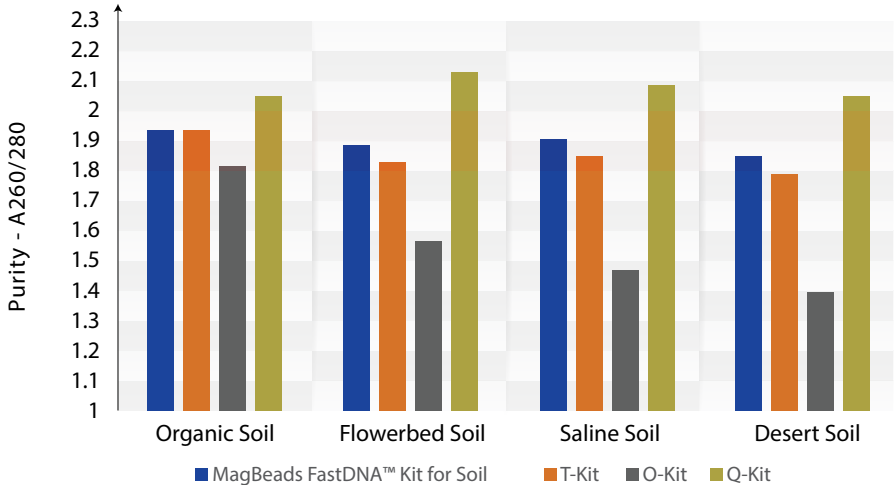
Automated Magnetic Processor



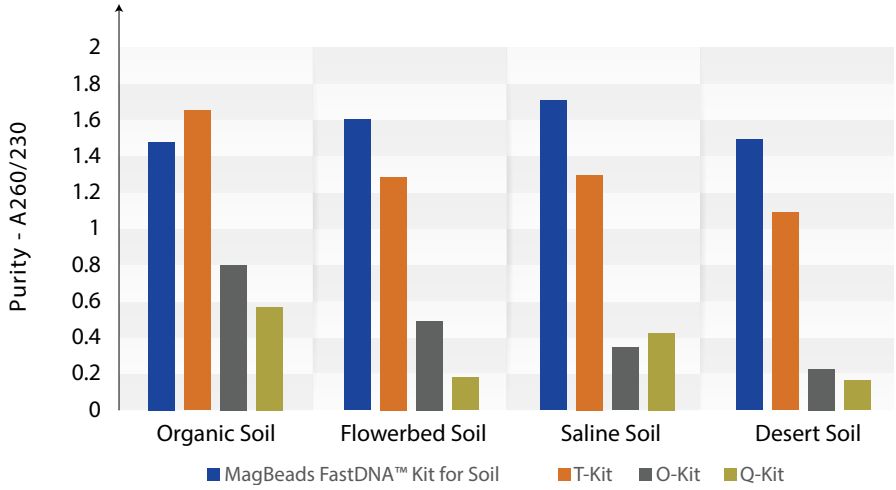
Product Comparison

MagBeads FastDNA™ Kit for Soil has the highest yield across different types of samples.



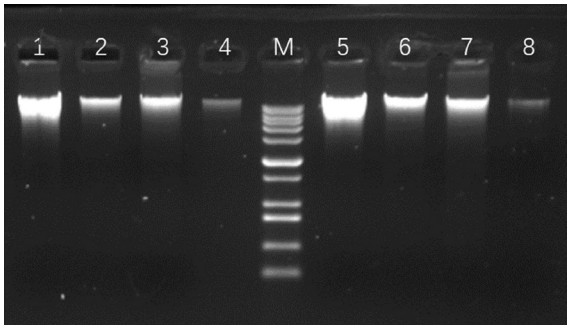


MagBeads FastDNA™ Kit for Soil has a consistent A260/280 reading in the desired range of 1.8 – 2.0. **Q Kit** has a A260/280 ratio that is higher than 2.0, indicating the presence of RNA contamination. **O Kit** has an inconsistency in results and A260/280 ratios falls below 1.8, indicating protein and/or other contaminations.



MagBeads FastDNA™ Kit for Soil has a consistent high level of purity based on A260/230 ratios. **Q and O Kit's** A260/ 230 ratios are inconsistent and lower than 1. Extracted DNA may contain organic compounds or humic acids.

Product Performance



Lane M: 1kb plus DNA ladder
Lane 1 and 5: Organic Soil
Lane 2 and 6: Flowerbed Soil
Lane 3 and 7: Saline Soil
Lane 4 and 8: Desert Soil

Genomic DNA was extracted from different soil samples using MagBeads FastDNA Kit for Soil. Agarose gel electrophoresis image showed a comparable profile between manual and automation extraction methods.

MagBeads FastRNA™ Kit for Feces

Advanced magnetic bead-based technology with proprietary inhibitor removal

for scalable, automatable RNA purification, eliminating fibers, undigested particles, bilirubin, polysaccharides, and lipids from diverse fecal samples

State-of-the-art bead-beating and lysis chemistry with selective RNA binding

ensuring efficient homogenization and complete DNA removal via FastDNase I treatment for high-purity RNA compatible with RT-qPCR

Fast and streamlined protocol

extracting up to 250 µg of total RNA from 200 mg of fecal samples with minimal handling steps

Versatile ready-to-use formats

available for MPure-32™ (Cat. No. 117040300) and MPure-96™ (Cat. No. 117040400) aNAP Systems

The **MagBeads FastRNA Kit for Feces** is a scalable, automatable magnetic bead-based technology for efficient RNA isolation from fecal samples, with ready-to-use versions (Cat. No. 117040300 & 117040400). It addresses challenges posed by dietary components like fibers, undigested particles, and lipids— which hinder RNA extraction— using advanced bead-beating technology, compatible lysis chemistry, and proprietary inhibitor removal. The kit features selective RNA binding and FastDNase I treatment to fully eliminate DNA, ensuring high RNA yield and purity. This streamlined process is compatible with RT-qPCR without additional purification steps.

Performance

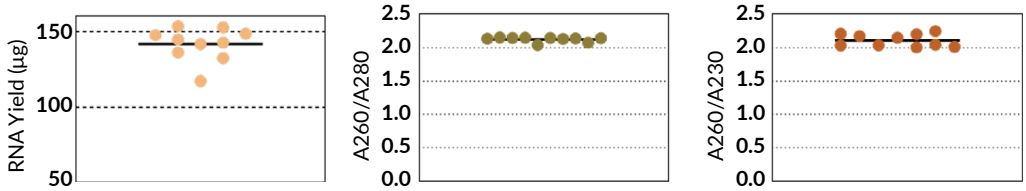

Figure 1. RNA Yield and Purity from Fecal Samples Extracted with MagBeads FastRNA Kit for Feces. RNA yield and purity (A260/A280 and A260/A230 ratios) obtained from three human fecal sources. Each dot represents an individual sample processed with the MagBeads FastRNA Kit for Feces.

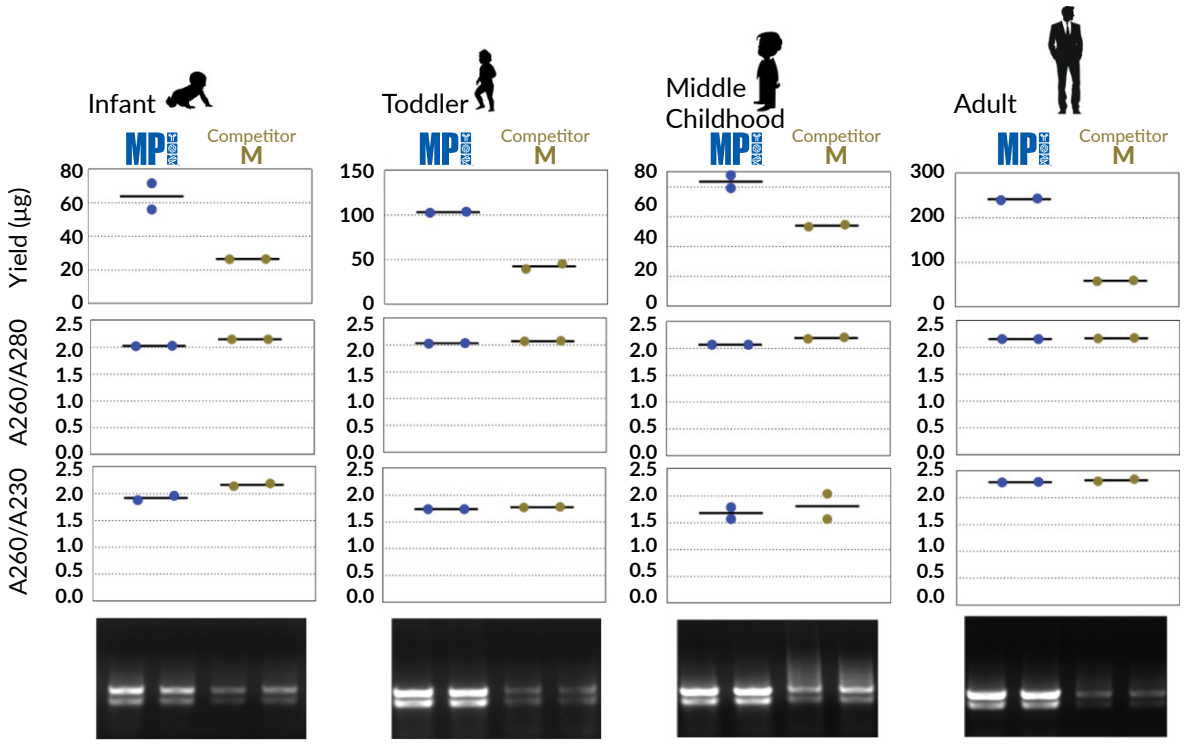

Figure 2. Performance evaluation of RNA extracted from human fecal samples using the MagBeads FastRNA Kit for Feces (MP) compared to Competitor M. RNA was independently extracted from human fecal samples (two extractions per sample, each dot on the plot represents one extraction). The RNA yield, purity (A260/A230 ratio) and integrity were assessed using spectrophotometry and agarose gel electrophoresis.

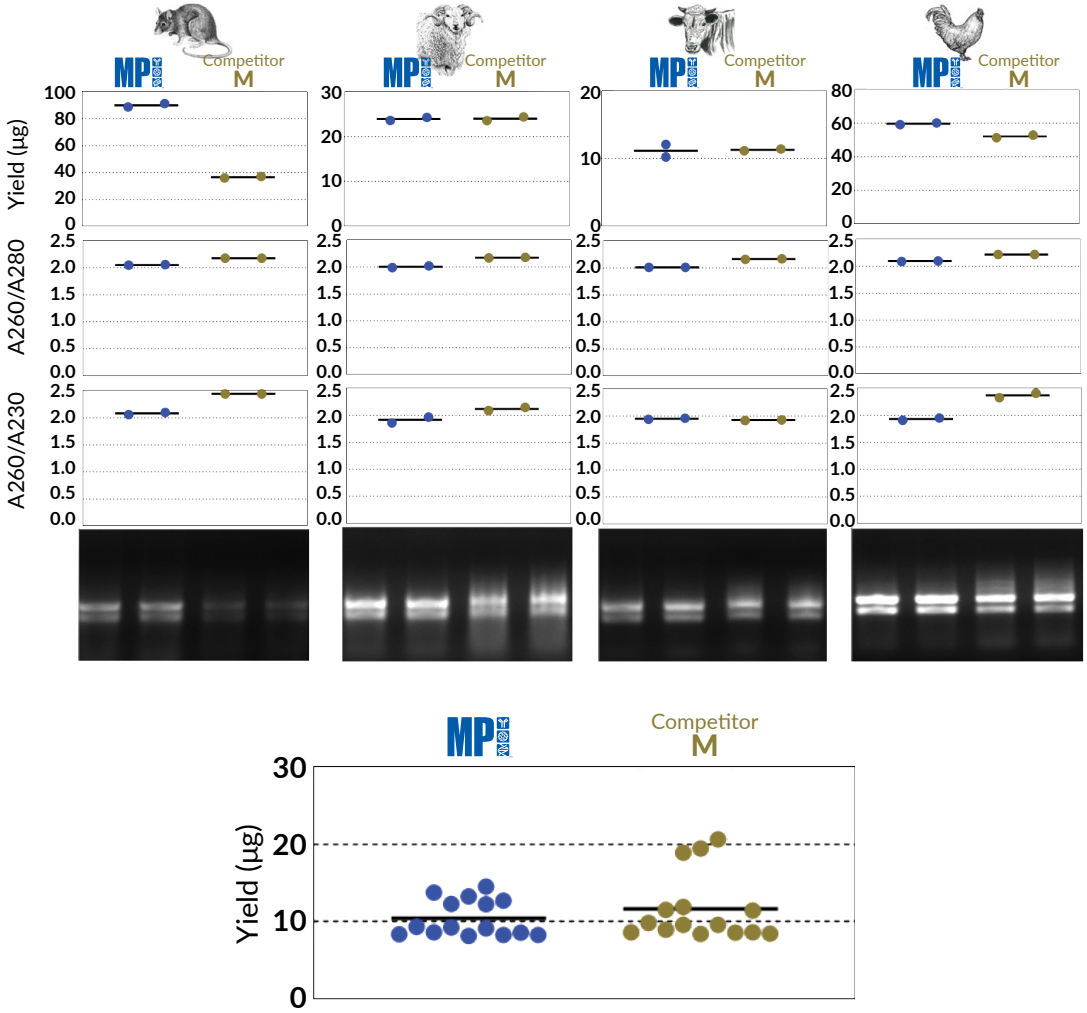

Figure 3: Performance evaluation of RNA extracted from animal fecal samples using the MagBeads FastRNA Kit for Feces (MP) compared to Competitor M. RNA was independently extracted from animal fecal samples (two extractions per sample, each dot on the plot represents one extraction). The RNA yield, purity (A260/A230 ratio) and integrity were assessed using spectrophotometry and agarose gel electrophoresis. In addition, the extracted RNA was also assessed for its amplifiability using qPCR and the Ct values given by MP are earlier than Competitor M. The horizontal bars indicate the median value.

MagBeads FastDNA MaxPure Kit for Feces

Advance Inhibitor removal capability

A specially formulated reagent system effectively eliminates common PCR inhibitors found in feces, including polysaccharides, heme, bile acids, humic acids, and phenolics.

High DNA Yield

Delivers yields of up to approximately 170 ng/mg from mouse feces, with strong purity ratios (A260/A280 ~1.8), ensuring DNA quality suitable for demanding downstream applications.

Performance

	MP	MP	Competitor O	Competitor O	Competitor T	Competitor T	Competitor Q	Competitor Q

SPINeasy®
Extraction Kit

SPINeasy® DNA Pro Kit for Soil

Effective isolation

of high quality genomic DNA from high biomass and low biomass sample

Unbiased

alpha diversity results

Higher purity

and shorter processing time

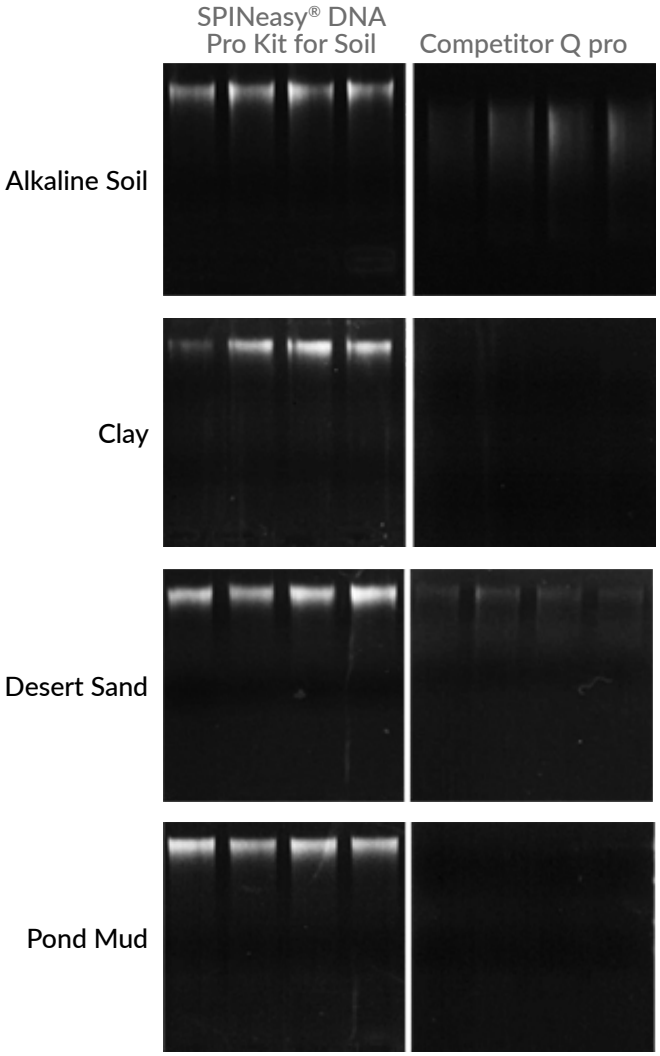
Vacuum manifold

compatible

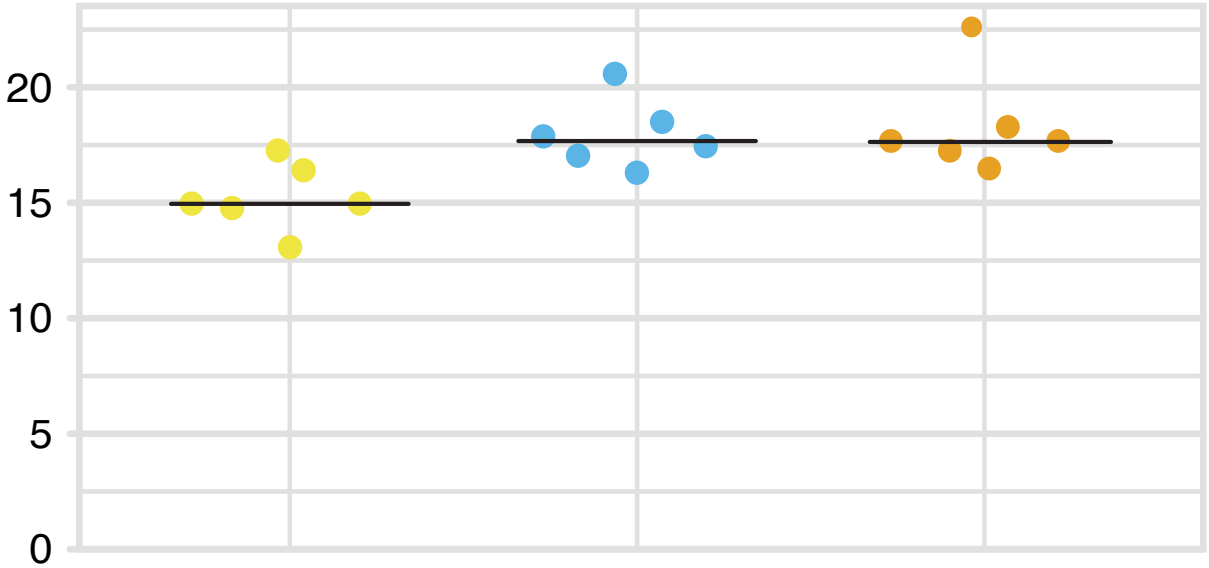
Soil samples are complex environments characterized by the presence of inhibitory compounds, such as humic acid, heavy metals, and other aromatic components which may prove to be challenging for downstream analyses. The **SPINeasy® DNA Pro Kit for Soil** has been carefully designed for the isolation of pure microbiome genomic DNA from challenging soil types including those with low biomass or those highly contaminated.

The **SPINeasy® DNA Pro Kit for Soil** effectively lyses various microbiome population, including bacteria, fungi, viruses, and protists. The kit provides similar yields to that of our highly cited FastDNA™ SPIN Kit, but with improved purity and reduced processing time. Isolated DNA products showed no inhibition in PCR and were immediately ready to be used in downstream applications, including long fragment PCR, qPCR, and next generation sequencing (16S and whole genome) without the need of further inhibitor removal step.

Product Performance



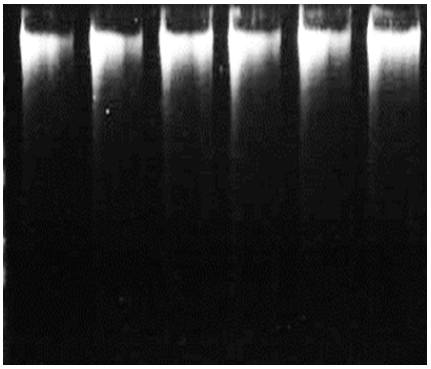
DNA extraction was performed on 250 mg of low biomass soil samples using **SPINeasy® DNA Pro Kit for Soil** and competitor Q Pro kit following manufacturer instruction.



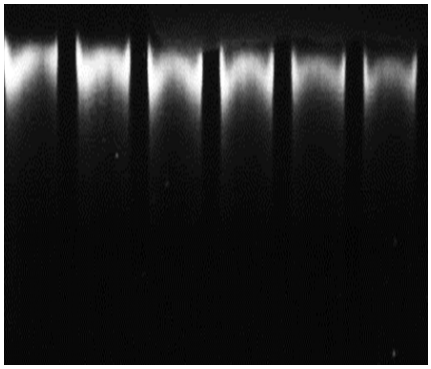
High biomass soil sample was processed using **SPINeasy® DNA Pro Kit** and other extraction kits. The extraction performance was evaluated using a spectrophotometer and summarized with a dot plot with each dot representing a single extraction, or agarose gel to assess the DNA integrity.

Integrity

SPINeasy® DNA Pro Kit for Soil



Competitor Q Pro



The **SPINeasy® DNA Pro Kit for Soil** gave superior yield, purity and integrity as compared to other extraction kits.

Order Information

Product Name	Size	Catalogue No.
SPINeasy® DNA Pro Kit for Soil	50 preps	116546050
	5 preps	116546000

SPINeasy® RNA Kit for Soil

Specially designed spin columns
to achieve consistent RNA yields of up to 25 µg from soil samples

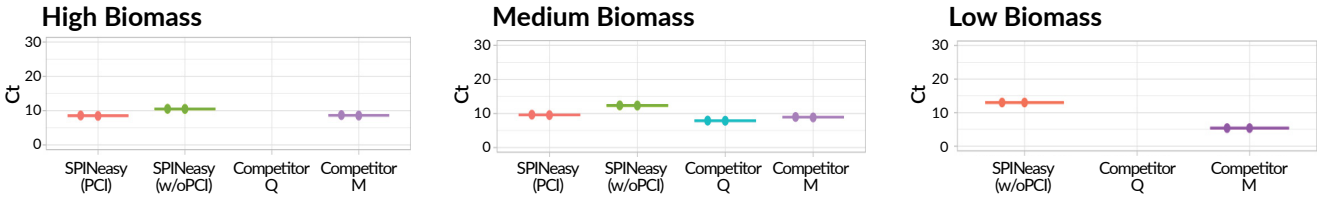
Simple and streamlined protocol
to minimize hands-on time

Suitable
for diverse soil types like compost, clay, sand, and low-biomass samples

Efficient inhibitor removal
to ensure high-quality RNA free from contaminants

The **SPINeasy® RNA Kit for Soil** is a high-performance RNA extraction kit utilizing silica-membrane spin-column technology. This kit allows for the efficient isolation of RNA from various soil types, including those with high humic acid content, heavy contaminants, compost, gardening soil, and low-biomass soils. The extraction process can be completed in under an hour with minimal RNA degradation, and the use of hazardous chemicals like phenol or chloroform is unnecessary. Our specially formulated inhibitor removal technology effectively handles soil samples containing humic acids, heavy metals, and other aromatic compounds, ensuring accurate PCR results. RNA extracted with this kit demonstrates high integrity and purity, suitable for downstream applications such as reverse transcription, real-time PCR, and sequencing.

Product Performance

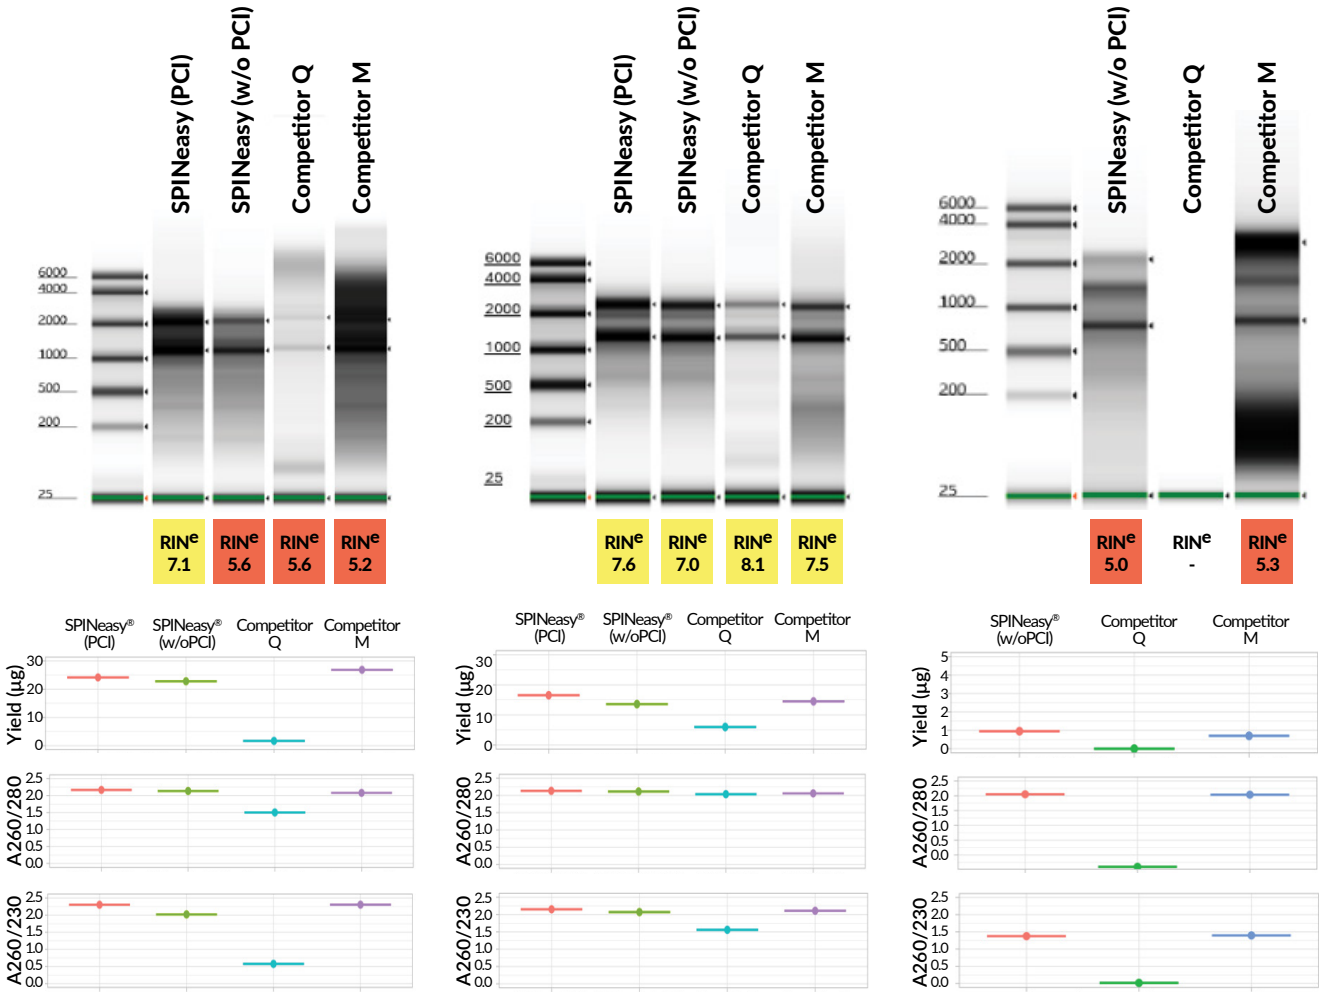


Comparison of Ct values from RT-qPCR using RNA extracted with the SPINeasy® RNA Kit for Soil versus competitors Q and M. Testing was conducted on high-biomass (50 ng), medium-biomass (50 ng), and low-biomass (30 ng) soil samples, with amplification performed using SYBR Green technology.

Organic Compost Soil from Location A (High Biomass Soil)

Organic Compost Soil from Location B (Medium Biomass Soil)

Garden Soil (Low Biomass Soil)



RNA was extracted from High (200 mg), Medium (250 mg), and Low (500 mg) Biomass Soils using the SPINeasy® RNA Kit for Soil and competitors Q and M. Yield was measured with the QuantiFluor® RNA System (Promega). Purity (A260/280 and A260/230 ratios) was checked with a spectrophotometer. RNA quality (virtual gel image and RIN, shown in yellow or red) was assessed using the Agilent Tapestation 4150.

Order Information

Product Name	Size	Catalogue No.
SPINeasy® RNA Kit for Soil	50 preps	116585050
	5 preps	116585000

SPINeasy® DNA/RNA Kit for Soil

Proprietary inhibitor removal technology

to eliminate humic acids, heavy metals, and aromatic compounds for pure DNA and RNA

Selective binding innovation

to enable simultaneous isolation of genomic DNA and RNA from challenging soils

Suitable

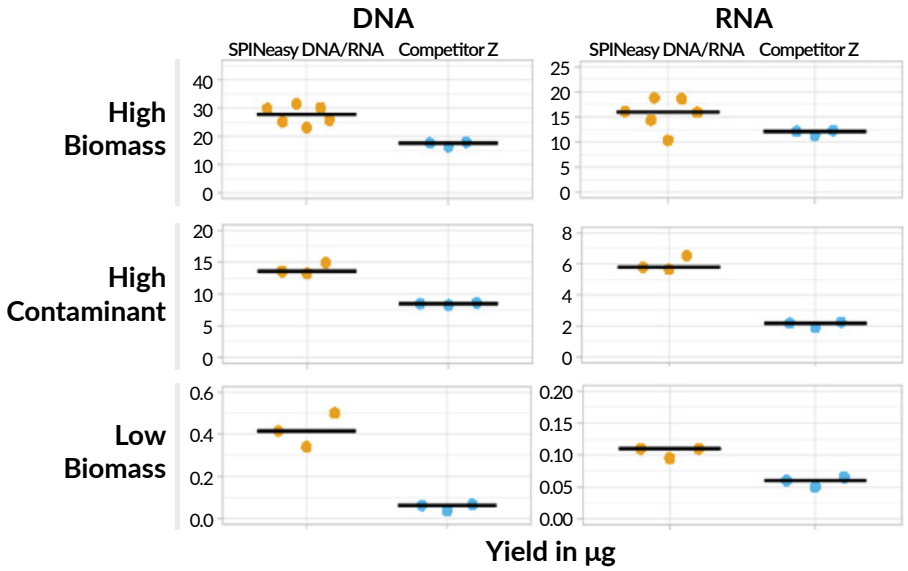
for diverse soil types, including low-biomass and highly contaminated samples

Fast and efficient protocol

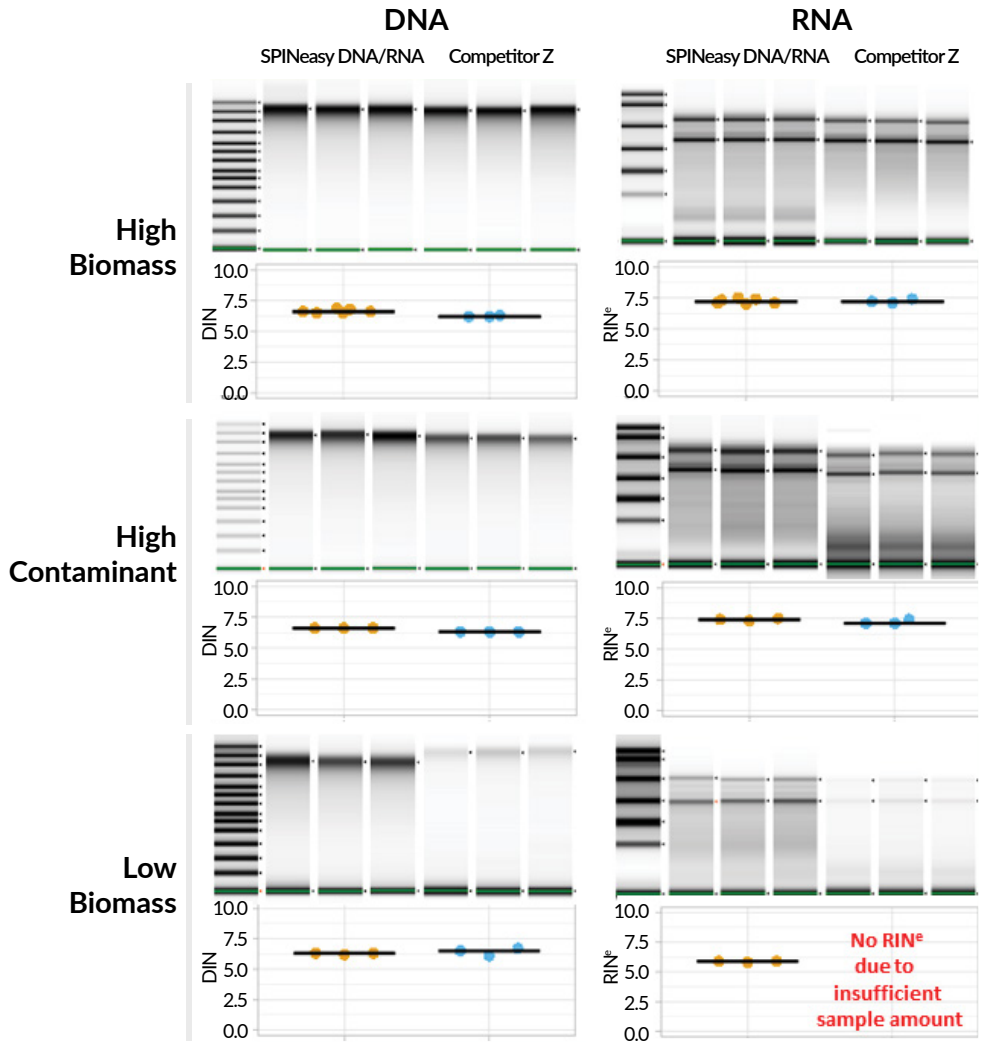
to complete extraction of up to 50µg DNA and 30µg RNA

Humic acids, heavy metals, and other aromatic components are among the most notorious PCR inhibitors found in the soil, leading to false negative or underestimated results. Non-optimized nucleic acid extraction protocol often co-purify inhibitors. The **SPINeasy® DNA/RNA Kit for Soil** integrates our proprietary inhibitor removal expertise and our new technology for selective binding of DNA and RNA. The **SPINeasy® DNA/RNA Kit for Soil** allows simultaneous isolation of pure microbiome genomic DNA and RNA from challenging soil types, including those with low biomass or those that are highly contaminated. The isolated nucleic acid products showed no contaminants and were immediately ready for use in downstream applications, including qPCR and RT-qPCR without the need of further inhibitor removal step.

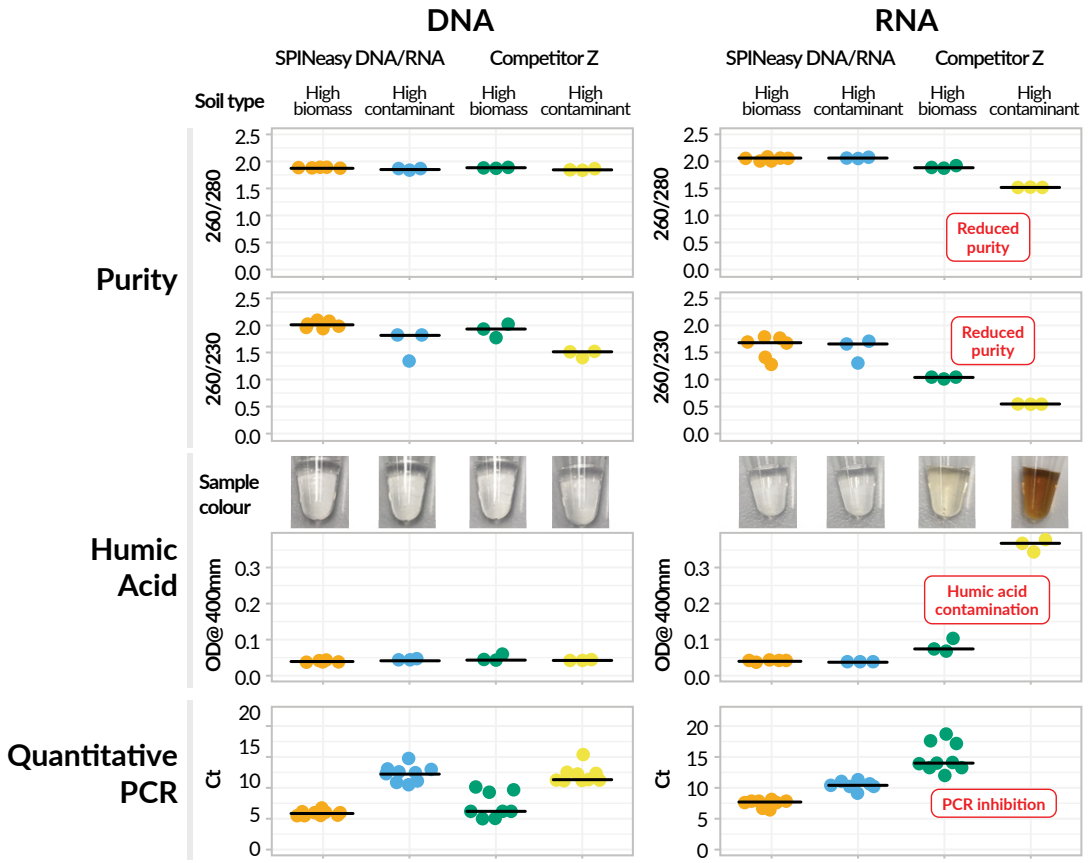
Product Performance



The SPINeasy® DNA/RNA Kit for Soil outperforms Competitor Z in nucleic acid yield. DNA and RNA were extracted from three soil types (250 mg each). Yields were measured by fluorometry, with each dot showing one extraction.



The SPINeasy® DNA/RNA Kit for Soil extracts high-quality DNA and RNA from tough soil types, including high-biomass, high-contaminant, and low-biomass samples. Virtual gels from Agilent 4150 TapeStation show DNA integrity (DIN) and RNA integrity (RIN) values. Each dot represents one sample.



Top Panel: Purity shown by A260/A280 and A260/A230 ratios.

Middle Panel: Images of DNA and RNA outputs; brownish color indicates humic acid, confirmed by spectrophotometer at 400 nm.

Bottom Panel: No inhibitors detected, proven by qPCR and RT-qPCR amplifying 1 µL undiluted sample with bacterial 16S primers.

to achieve better yield and purity of fecal DNA

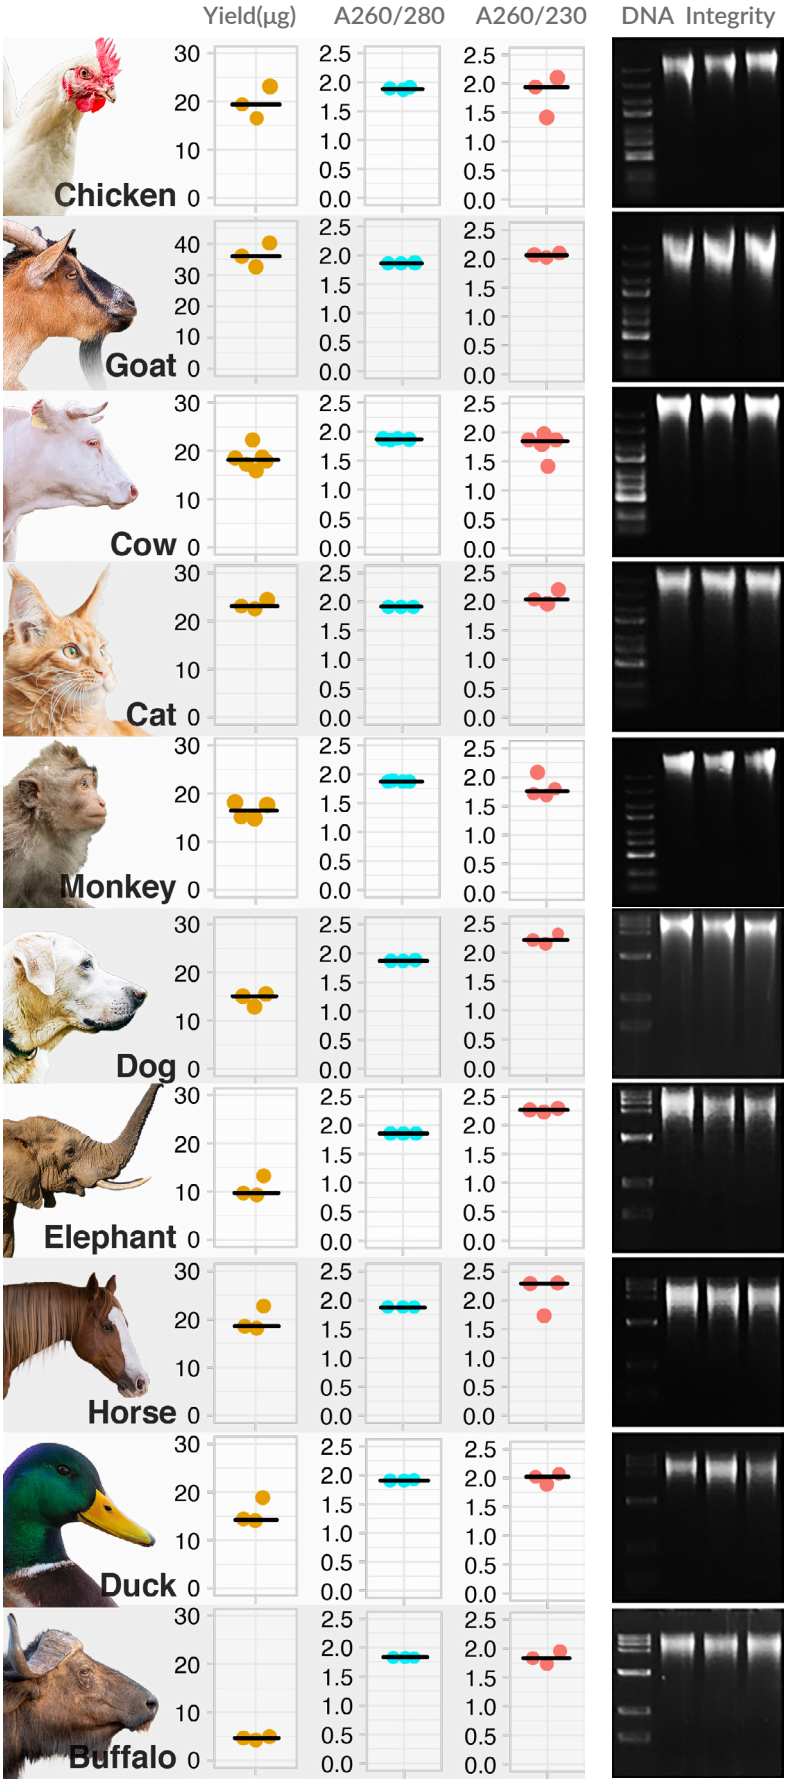
Easy to handle
and minimize any risk of contamination

Suitable
for various types of feces samples

User friendly
suitable for any scale of experimental throughput

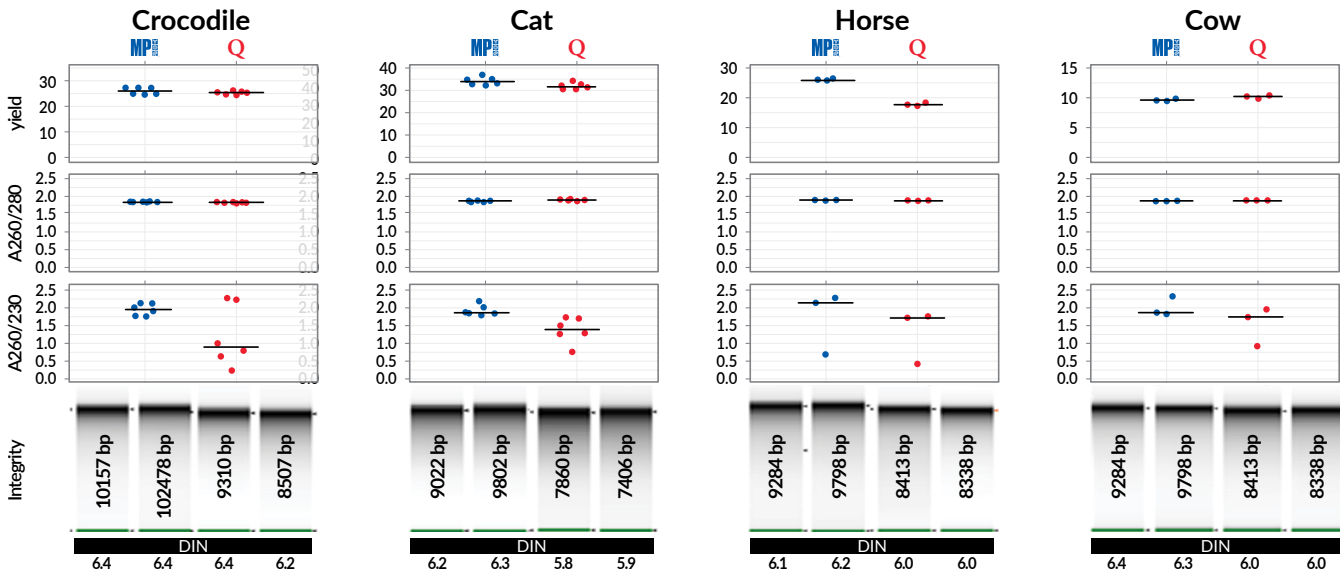
DNA extracted from fecal samples has just been made easier with our newly updated SPINeasy® DNA Pro Kit for Feces. Challenges that we may face from fecal samples are simply eliminated through the kit by bead beating with the new Lysing Matrix YB and lysis Buffer SF1. Subsequent treatment with Buffer SF2 effectively removes humic acid and other contaminants. The chemistry included in Buffer SF3 enables the specific binding of DNA without co-purification of RNA, eliminating the need for RNase A treatment. DNA obtained from fecal samples showed no inhibition in PCR and was immediately ready-to-be used for downstream applications, including long fragment PCR, qPCR, and next-generation sequencing (16S and whole genome) without the need for a further inhibitor removal step.

Extraction Results for Feces



The SPINeasy® DNA Pro Kit for Feces provides high-quality DNA from various fecal samples.

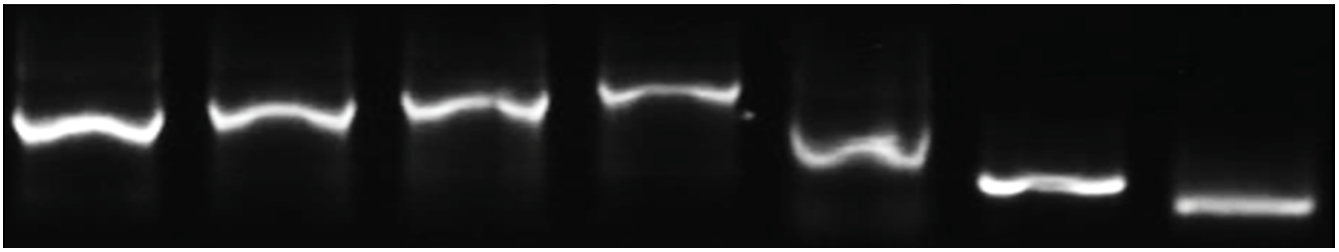
Comparison versus competitor Q



The DNA extracted using SPINeasy® DNA Pro Kit for Feces or competitor Q kits were compared in terms of yield, purity (A260/280 and A260/230 ratios), and integrity. Representative virtual gels obtained from Agilent 4150 TapeStation analyses showed the DNA integrity value (DIN) and the size of the genomic DNA band in bp.

Amplifiability

End Point PCR



The absence of inhibitor in fecal samples obtained using **SPINeasy® DNA Pro Kit for Feces** was assessed using inhibitor-sensitive PCR and undiluted sample as well as quantitative PCR.

SPINeasy® DNA Kit for Water

Significantly improve the purity
of extracted DNA

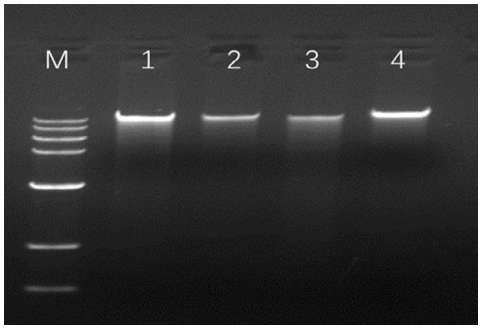
Rapid lysis
of microorganisms yields high concentrations of pure DNA

Suitable
for various types of water samples

Safe extraction process
does not require phenol, chloroform or other toxic reagents

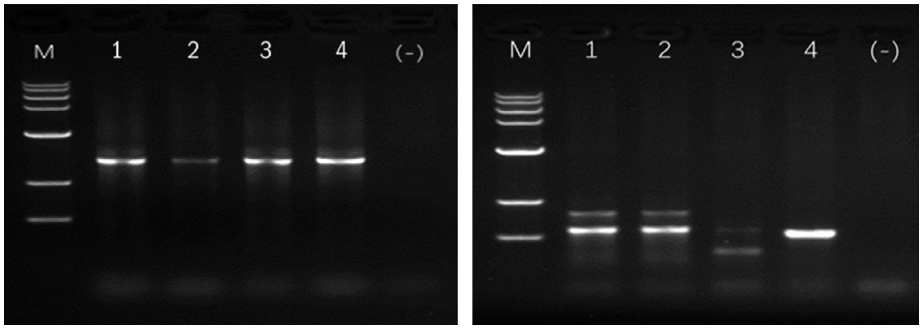
SPINeasy® DNA Kit for Water is specially designed to achieve quick isolation of genomic DNA from various types of water. This kit employs silica-membrane spin-column technology to effectively bind DNA. The resulting high-quality DNA can be used for downstream analyses. The kit is supplied with 5 mL lysing matrix and a sterile 0.22 µm filter membrane.

Product Performance



Lane M: DNA ladder
Lane 1: 100 mL river water
Lane 2: 165 mL pond water
Lane 3: 1000 mL sea water
Lane 4: 15 mL sewage

gDNA extracted from different types of water samples using SPINeasy® DNA Kit for Water, analyzed using 1 % agarose gel, and electrophoresed at 70 V for 30 min



Lane M: DNA ladder
Lane 1: River Water
Lane 2: Pond Water
Lane 3: Sea Water
Lane 4: Sewage
Lane (-): Negative Control

16S- PCR (left) & ITS-PCR (right) amplification of gene from different types of water samples using SPINeasy® DNA Kit for Water

Samples	Sample Volume$_{(mL)}$	Yield$_{(ng/\mu L\ sample)}$	A$_{(260/280)}$	A$_{(260/230)}$
River Water	100	46.22	1.88	1.90
Pond Water	165	19.85	1.86	2.32
Sea Water	1000	28.39	1.92	2.00
Sewage	15	120.32	1.83	1.65
