# ImmunO™

Immunodiffusion Plates, Uncalibrated, unfilled

Catalog #: 42165

Lot #: Q9285

**Description:** Plates are polystyrene with close-fitting covers to minimize gel dehydration. Plate bottoms are recessed 7 mm to prevent scratching on the bench surfaces. The plate is hydrophilic for easy gel pouring and better adherence to the plate. The working surface of the plate is 95 mm by 45 mm.

**Use:** MP's immunodiffusion plates are intended for use in double immunodiffusion and single radial immunodiffusion.

**Calibration:** These plates are uncalibrated.
