ImmunO™

Rat Anti-Mouse IgG
Alkaline Phosphatase Conjugated
Catalog #: 63570
Lot #: 91008

Form: Lyophilized powder. Reconstitute with 1 ml of distilled water. The product is in 50 mM Tris, 150 mM NaCl, 1 mM MgC₁₂, pH 7.5 containing 1% bovine serum albumin and 0.05% sodium azide.

Preparation: Monoclonal rat anti-mouse IgG specific antibody is conjugated with highly purified alkaline phosphatase (calf intestine) by a modified glutaraldehyde method. This monoclonal is from a mixture of clones LO-MG-7, LO-MG1-2 and LO-MG3-7.

Specificity: Reacts with all subclasses of mouse IgG. Also reacts with human IgG due to LO-MG1-2.

Recommended

Working Dilutions: 1:500 for ELISA

Working dilution for specific application should be determined by the investigator to obtain the best condition.

Storage: Store at 2-8°C. Stable for one year in dry form.

Approved by: Joseph Dietz, Ph.D.
Quality Control Director

Control # R049
