

TECHNICAL INFORMATION

Catalog Number: 100888

p-Nitrophenyl Acetate

Structure:

Molecular Formula: C₈H₇NO₄

Molecular Weight: 181.15

CAS # : 830-03-5

Synonym: 4-Nitrophenyl acetate

Physical Appearance: Off white to pale yellow crystalline powder

Description: Used with iodoacetic acid for reductive cleavage of methionine-containing peptides. Also a chromogenic esterase substrate.

Solubility: Soluble in methanol (10mg/ml-clear, slightly yellow solution)
