

## TECHNICAL INFORMATION

Catalog Number: 101383, 102897, 194637

### Cholic Acid

#### Structure (free acid):

#### Molecular Formula:

**Free Acid**

**Sodium Salt**

C<sub>24</sub>H<sub>40</sub>O<sub>5</sub>

C<sub>24</sub>H<sub>39</sub>O<sub>5</sub>Na

#### Molecular Weight:

408.6

430.6

#### CAS #

81-25-4

361-09-1

**Synonyms:** 3a,7a,12a-Trihydroxy-5b-cholan-24-ic acid; Cholalic acid; Sodium cholate

**Physical Description:** White to off-white powder

**Description:** A biochemical solubilizing agent (a non-ionic, non-denaturing detergent). Occurs in conjugation with glycine or taurine in bile of most vertebrates.<sup>1</sup> Used in the solubilization of membrane-bound proteins in their native state.<sup>5</sup> A component for the preparation of liposomes.<sup>7</sup>

**Critical Micelle Concentration (CMC):** 14 mM (Detergents with high CMC values are generally easy to remove by dilution; detergents with low CMC values are advantageous for separations on the basis of molecular weight. As a general rule, detergents should be used at their CMC at a detergent-to-protein weight ratio of approximately ten .<sup>8,9</sup>

#### Solubility:

**Free Acid:** Soluble in alcohol (30.56 g/L - clear to very slightly hazy, colorless to faint yellow solution), acetone (28.24 g/L), glacial acetic acid (152.12 g/L), solutions of alkali hydroxide, solutions of carbonates; moderately soluble in ether (1.22 g/L), chloroform (5.08 g/L); slightly soluble in water (0.28 g/L).<sup>1</sup>

**Sodium Salt:** Soluble in ethanol or water (40 mg/ml - clear, colorless solution)

#### Availability:

Catalog Number	Description	Size
101383	Cholic acid, free acid	25 g 100 g 500 g 1 kg
102897	Cholic acid, sodium salt	10 g 25 g 100 g 500 g 1 kg 5 kg
194637	Cholic acid, sodium salt, cell culture reagent	10 g 25 g 100 g 500 g
