TECHNICAL INFORMATION

Catalog Number: 56006

Goat Antiserum To Sheep Serum (Forensic)

DESCRIPTION: Product is the lyophilized powder of goat antiserum to sheep serum and buffer salts.

The antiserum is prepared by immunizing goats with sheep serum; antiserum is delipidated and made specific by immunoabsorption with soluble antigens or solid-phase immunoabsorption where appropriate. The resulting antiserum is dialyzed into 0.02M sodium phosphate, 0.14M sodium chloride, pH 7.3, adjusted to standard titer, filtered through a 0.22 µm filter, vialled and lyophilized.

USES: This product is intended for use as a precipitating antibody. It gives sharp precipitin lines in immunoelectrophoresis, capillary tube, and immunodiffusion techniques.

SPECIFICATIONS: The total protein is measured using the Biuret procedure, with bovine albumin as the standard. The product shows the following reactions at the stated sheep serum dilutions:

Typical Values Follow. Please see lot specific credential for exact values:

Sheep Serum Dilution	Assay		Precipitin Assay	
	Immunodiffusion	Micro Tube	15 Minutes	30 Minutes
	24 Hour	48 Hour		
1:3	++++	++++	++++	++++
1:10	+++	+++	++++	++++
1:100	+	+++	++	++
1:1000	0	+	0	0

The product has been tested at 60 mg/ml and found negative against the following whole sera at 20-25 mg/ml:

BearDeerHamsterMouse
BovineDogHorseRabbit
CatGoatHumanRat
ChickenGuinea PigMonkeySwine

RECONSTITUTION: Reconstitute product with 2.0 ml of deionized or distilled water. Gentle swirling may be used to speed rehydration. Avoid vigorous shaking of the reconstituted material. If a small amount of precipitate is present, or if preparation

appears cloudy, clarify by centrifugation or filtration.
