## TECHNICAL INFORMATION

# ImmunO™

Catalog Number: 670101

### Donkey Anti-Goat IgG (H + L), Affinity Purified

**Form:** Liquid. In 0.01M sodium phosphate, 0.25M NaCl, pH 7.6.

**Preparation:** The antibody was isolated from antisera by immunoaffinity chromatography using antigens coupled to agarose beads.

**Specificity:** The antibody reacts with the heavy chains on goat IgG and with light chains common to most goat immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins, but antibodies may cross-react with immunoglobulins from other species.

**Note:** This product may contain a preservative such as sodium azide, thimerosal or proclin. Please see lot specific chemical credential for preservative information.

[If a titer/working dilution is not given above, please click here to see a general dilution chart for working with antibodies. Please note that the general dilution chart should only be used as a guideline. Each lab should determine their own optimal working dilution.](#)

[Will this antibody work with your application? Please click here to see a general chart of antibody applications. Please note that any information given above is primary application data. The general applications charts should only be used as a reference.](#)
