

# Certificate of Analysis

Product is the lyophilized powder of human Albumin. Human Albumin is purified from pooled human plasma using multistep procedures which may include precipitation, ion exchange and affinity purification. The product is dialyzed into 0.02M solution of Tris Buffer, pH 7.4; followed by ultrafiltration, vialled and lyophilized. No preservative has been added. This product is designed for research use only.

Product Name: Albumin, Human  
Catalog #: 0219134905  
Lot #: SA2409  
Storage Temperature: Store at 2-8°C.  
Expiry date: September 2027
